DESCRIPTION OF XO 270 RS CABIN

The airy and comfortable wheelhouse offers seating for the entire crew and provides excellent all-around visibility thanks to large windows. Dual roof hatches and an aft sliding door can be opened when weather conditions allow.

The helm station is ergonomically designed with an adjustable steering wheel and a shock-absorbing, adjustable seat, with all controls conveniently positioned. A refrigerator is located under the seat.

Around the table in the wheelhouse, as well as on the bench opposite, the entire crew can enjoy unobstructed views while underway. The table can also be lowered to form a berth for two people. To port there is a separate head with a water WC, and to starboard a quarter berth.

Both the aft and forward cockpits offer generous storage space, and the wheelhouse table can also outdoor.

The powerful 300 hp outboard engine, automatic trim tabs, and the deep-V hull design provide excellent handling characteristics in all weather conditions.

The boat is in very good condition and well equipped with radar, heater, solar panel, etc. The engine has only 250 running hours.

Winter storage in a heated hall in Hanko, approximately 1.5 hours west of Helsinki, Finland.
